<https://rashidnaveed.github.io/MyFolio/>

**Software Engineer** having 1.5 years of overall experience of front-end development using React JS, React Native and back-end development using Node JS and Adonis JS. Excellent **Technical** experience in Application Analysis, Design implementation, Maintenance and Troubleshooting.

Experience in all phases of project life cycle, requirements gathering, **Business Requirement Document**, client interaction, daily task, QA support and deployments on server.

Inspired **JavaScript** Full Stack Developer with good knowledge of frontend and back-end technologies. Creative, analytical, and productive team player with a deep passion for technology. Self-motivated and enthusiastic for MERN stack development. I have hands-on experience of React JS for front end development, React Native for mobile application development and API development using node JS and adonis JS framework.

**Common libraries of use:** Axios, Redux, react-router, redux-thunk, Enzyme, Jest, Mongoose, Express, lodash and mirage js.

**Common use of UI libraries:** Bootstrap 4, React-Bootstrap, MDB React, Material-UI React Native Paper.

---

## Strength & Skills

### Front End

- React JS
- React Native
- CSS 3
- HTML 5
- Bootstrap
- Material UI

### Backend

- Node JS
- Adonis JS

### Database

- MySQL
- MongoDB
- SQL

### Language

- JavaScript
- TypeScript

### Other

- GIT / bitbucket
  - JIRA
  - OOP
-

## Experience

10/2019 – PRESENT

**React JS Developer / ExpertsCloud**

### Responsibilities:

1. Working as a Full Stack Developer.
2. Gathering, analyzing requirements and making data flow documents.
3. Analyze the system for possible business solutions/bugs/upgrades.
4. Work with technical and non-technical client requirements directly by designing, developing, and implementing web applications.
5. Completed different short assignments.

### Applications:

#### Application: (Helpmymedicare-web)

1. Dealt with the team to analyze and document client's requirements.
2. Design the front end Structure in React.js.
3. Utilize Web API designed in Adonis.js.
4. State management using Redux.
5. Token based Authentication.
6. Implement payments using Stripe.
7. Complete deployment on AWS.

### Environment:

Technologies: React.js, Redux, Material-ui, Ad-Grid, Lodash, Axios and React-Router-Dom.

Development Tools: Visual Code ,Git.

#### Application: (OptimalHCM-web)

1. Debug and update front end Structure using React.js.
2. Utilize Web API designed in Adonis.js.
3. Update API using Adonis.js.
4. State management using Redux.
5. Token based Authentication.
6. Complete deployment on AWS.

### Environment:

Technologies: React.js, Redux, Material-ui, Lodash, Ag-Grid, Axios and React-Router-Dom.

Development Tools: Visual Code, Git.

## Application: (GidyOpps-web)

1. Designing front end Structure using Preact.
2. Utilize Web API designed in python.
3. Using Chart.js to implement graphs.
4. State management using Context Api.
5. Using mapbox to implement map functionality.
6. Token based Authentication.

## Environment:

Technologies: Preact, Context Api, Material-ui, Ajax and preact-async-route.

Development Tools: Visual Code, Git.

---

## Projects

02/2019 – 01/2020

### Web Developer / COMSATS University Islamabad

**Languages/Tools/Technologies:** Sublime, HTML, CSS, Bootstrap, JavaScript, Ruby on Rails.

Developed, coded, and updated the Project Management system in the Software House website as a **final year** project for COMSATS University Islamabad. Developed front-end using HTML, CSS, and Bootstrap. Developed project in Ruby on Rails.

03/2020 – 03/2020

### React JS / Hooks / Learning Purpose

#### NetFlix Clone

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS, JavaScript, API Calls, Google firebase firestore, React Hooks, movie trailer and react-youtube.

Developed a website named **NetFlix Clone** for self-learning to get hands-on experience in React. Designed a website using React and google firebase to extend my knowledge and experience and use external api like **TMDB** to get movies list and **react-youtube** to show trailers and implement videos in the website.

[GitHub Link](#) | [Live Demo](#)

03/2020 – 03/2020

## React JS / Hooks / Learning Purpose

### Messenger Clone

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS, JavaScript, API Calls, Google firebase firestore, React Hooks.

Developed a website named **Messenger Clone** for self-learning. Designed a website using React and google firebase to extend my knowledge and experience in real time database using google firebase and implement chat functionality.

[GitHub Link](#) | [Live Demo](#)

03/2020 – 03/2020

## React JS / Hooks / Learning Purpose

### TikTok Clone

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS, JavaScript, API Calls, Google firebase firestore, React Hooks.

Developed a website named **TikTok Clone** for self-learning. Designed a website using React and google firebase to extend my knowledge and experience.

[GitHub Link](#) | [Live Demo](#)

03/2020 – 03/2020

## React JS / Hooks / Learning Purpose

### Youtube Clone

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS, JavaScript and React Hooks.

Developed a website named **Youtube Clone** for self-learning. Designed a website using React and copied the layout youtube home page to grip on frontend design of every kind.

[GitHub Link](#) | [Live Demo](#)

02/2020 – 02/2020

## React JS / Redux / Learning Purpose

### MyBurger

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS, Bootstrap, JavaScript, Redux, React Routing, API Calls, Google firebase, React Hooks.

Developed a website named Burger Builder for self-learning by understanding and implementing basic to advanced level concepts like states, props, API calls using Axios, React Routing, Redux, Hooks, and Life cycle methods.

[GitHub Link](#) | [Live Demo](#)

I also implemented the same project in React hooks.

[GitHub Link](#)

01/2020 – 01/2020

### **React JS / Redux / Learning Purpose**

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS, JavaScript and Redux.

Developed a project to get hands-on experience and knowledge of state management using **Redux**.

[GitHub Link](#)

01/2020 – 01/2020

### **React JS / Hooks / Learning Purpose**

**Languages/Tools/Technologies:** React, VS Code, HTML, CSS JavaScript and React Hooks.

Developed a project to get hands-on experience, understanding, and in-depth knowledge of **React Hooks**.
